

# Coir fibre blocks

## ***What is a coir fibre block?***

Its a compressed coconut fibre block.

## ***Why is it beneficial to my planting project?***

Coir retains up to 150 times more water than other mulches. Adding coir to your gardens and reveg planting provides plants with access to nutrients directly absorbed by the coir

## ***How do I use Coir?***

- Fill half a wheelbarrow with water, add one block and leave to soak.
- Once absorbed, coir will expand to fill wheelbarrow and can be used for top soil mulching or mix in with soil to improve water retention.

# \$12.00 PER BLOCK
